

IMAI 1/24 SCALE PLASTIC MODEL KIT

VOLKSWAGEN CABRIOLET

**NOT INCLUDED
IN THIS KIT:**

Wire

Midget lamp × 2

"AA" SIZE
UM-3 × 1

MABUCHI
FA-130
MOTOR

53 × 2

54 × 2

55 × 1

Due to the *optional* motorization capabilities designed into this kit, you will find certain parts and assembly steps included with-in this kit — *and instruction sheet* — that apply directly to mounting a motor and batteries (*not included*), on-off switch and wiring.

All motorization requirements (*shaded panels*) are fully illustrated and explained — should you choose this option — though excluding it will not alter the structure or realism for display purposes.

- **Before beginning:** Compare all parts groups with the diagrams shown here — to ensure your kit is complete.
- **Painting:** Should you choose to paint certain areas, such as Door Handles, Instruments, Wipers, etc. (*as suggested within the instructions*) for extra detail realism, best results should be obtained by painting these parts prior to assembly — while still attached to the carrier "tree."
- **Assembly:** It is always advisable to test-fit all parts before applying cement. Follow the symbols carefully, noting when to press-fit, cement, hammer, push-through, or cement.
- **Decals:** Trim one item at a time from the main sheet and apply separately. Immerse in warm water for approx. 10 seconds, then position one edge of decal in position, sliding the backing sheet out from under. Use a tissue or Q-tip to soak up excess water.
