

P1005-100

- 1/25 SCALE MODEL KIT
- SNAP-TOGETHER ASSEMBLY

POLAR LIGHTS®

READ THIS BEFORE YOU BEGIN

This kit can be assembled by snapping together the parts as indicated by the instructions. However, if you wish to glue the pieces in a conventional manner, and detail the kit with paints, that is also an easy task.

GENERAL ASSEMBLY

- Before assembling model, study diagram carefully.
- For best results, assemble model exactly in the order indicated.
- Take time to familiarize yourself with all the parts and their corresponding part numbers.
- Carefully cut the parts from the plastic tree supports and remove any burrs.

OPTIONAL GLUING TIPS

- This kit is molded of styrene plastic – use only styrene compatible glues or cements.
- Before proceeding to cement parts together, it is advisable to fit parts together dry (without cement) so that you may familiarize yourself with the parts and how they go together, also noting the points where cement is to be applied.
- Apply cement to inside surfaces only and avoid getting cement on outer surfaces of model sections.
- Use cement sparingly, being careful to avoid getting cement on hands, so as not to mar or smear plastic surfaces.
- Do not hurry. Work carefully and patiently.

PAINTING GUIDE

Paint is not required to complete this model but it is an option for the builder. For best results when painting, use only high quality paints designed specifically for use on plastic model kits.

Paints listed here are suggestions to match colors already applied to the model. Modelers may choose to research the colors further to find colors that satisfy their own judgement.

PAINT COLORS

A	Black	F	Transparent Red
B	Flat Black	G	Transparent Amber
C	White	H	Pearl White L87 (Pantone 9103C)
D	Steel	J	Gray (Pantone 428C)
E	Chrome (Bright Silver)	K	Light Gray (Pantone 422C)

Note: When paint symbols are placed next to a part number, this indicates the entire parts should be painted. When the symbol is placed on a part, this indicates that only specific areas should be painted.
